## CITY of WESTMINSTER

April 6, 1990

Mr. Robert Nelson, Jr.  
Manager of Rocky Flats Office  
U.S. Department of Energy  
Rocky Flats Area Office  
P.O. Box 928  
Golden, Colorado 80402-0928

Mr. B.P. Warner  
President and General Manager  
EG&G Rocky Flats, Inc  
P.O. Box 464  
Golden, Colorado 80402-0464

Dear Mssrs Nelson and Warner

I am writing to request a firm contingency plan in the event that an unplanned release of Pond C-2 should occur before the bypass pipeline is in place.

Westminster believes that the best option would be to block the Woman Creek culverts at Indiana Street and collect the water for ultimate disposal to the Great Western Reservoir interceptor canal. Sufficient capacity should be available upstream of Indiana Street to hold five to ten acre feet, which at current Pond C-2 inflows, would provide sufficient storage for 15 to 30 days of overflow

Steps should be taken at the same time to hold the maximum volume native Woman Creek water in Pond C-1, to limit the amount of water which would need to be held at Indiana Street. We expect DOE and EG&G to take the steps necessary to be prepared to act in the event this contingency plan is needed. This plan provides the added benefit that no outside permission is needed or agencies, municipalities, or companies must be dealt with.
